14 LBS/BOX	15 or 20 LB BOXES

Custom packing available.

## FRESH BASIL

G2 Farms was founded on three basic principles; to provide fresh domestic basil year-round, to incorporate the highest standard in Food Safety and to grow delicious basil. Drawing from our South Texas fields, our 1.5 acre hydroponic greenhouses and our sister fields in Hawaii, we are able to bring a consistent year-round supply and price for our fresh basil. We provide two-cuts; short stem for processing (think pesto!) or long stem for retail (great for restaurants and food service).

G2 Farms is a HACCP certified grower. Our strong GMP Programs, Sanitation Programs, Quality Control Programs, Allergen Control Programs and our adherence to GAP, provide an uncompromising foundation for food safety and quality. We validate our programs with pre-harvest pathogen testing for all of our fields. We are also voluntary participants of the California Leafy Greens Program. Product specs available upon request.
